
APPENDIX 4.
“CHAS” TABLES

Appendix 4 - CHAS Housing Problems Tables

The assessment of Contra Costa County's housing needs relies on custom tabulations of U.S. Decennial Census data provided by HUD. These tabulations are referred to as the "CHAS" tables. They are obtained using HUD's "State of the Cities Data System" (SOCDS). These data are presented in two main tables, one presenting "housing problems" by households and the other presenting "affordability mismatch" by housing units. The needs of renter and owner households are examined separately.

The following are the housing problems tables for the State of California, Contra Costa County, the Urban County area, and the five entitlement communities. Because of the nature of the Consortium, data tables were acquired according to the CDBG geography. Although this best approximates the jurisdictional boundaries within the Consortium, it does introduce a significant level of rounding in the data.¹

The CHAS housing problems tables present the number of households paying more than 30 percent and 50 percent of gross income for housing by tenure, household type, and income category. This cost of housing as a percentage of gross income is referred to as the housing "cost burden." According to HUD, a household which has a housing cost burden over 30 percent has a "high" housing cost burden. Those with a cost burden over 50 percent have a "severe" cost burden.
